

(2) The Commission also considered the possibility of performance requirements for lawn darts to determine which lawn darts present an unreasonable risk of injury of skull penetration to children, but such requirements were determined not to be feasible.

(f) *Conclusion.* The Commission finds:

(1) That this rule, including its effective date, is reasonably necessary to eliminate or adequately reduce the unreasonable risk of skull puncture wounds to children associated with lawn darts and will also eliminate or reduce the other injuries, including puncture wounds, that have been associated with this product.

(2) That issuance of the rule is in the public interest.

(3) That no feasible consumer product safety standard would adequately protect the public from the unreasonable risk associated with lawn darts.

(4) That the benefits expected from this rule bear a reasonable relationship to its costs.

(5) That the rule imposes the least burdensome requirement which prevents or adequately reduces the risk of injury for which the rule is being promulgated.

§ 1306.5 Effective date.

This rule is effective December 19, 1988 and applies to all lawn darts in the chain of distribution on or after that date.

PART 1401—SELF PRESSURIZED CONSUMER PRODUCTS CONTAINING CHLOROFLUOROCARBONS: REQUIREMENTS TO PROVIDE THE COMMISSION WITH PERFORMANCE AND TECHNICAL DATA; REQUIREMENTS TO NOTIFY CONSUMERS AT POINT OF PURCHASE OF PERFORMANCE AND TECHNICAL DATA

Sec.

1401.1 Scope.

1401.2 Purpose.

1401.3 Definitions.

1401.4 [Reserved]

1401.5 Providing performance and technical data to purchasers by labeling.

1401.6 Effective date.

AUTHORITY: Secs. 2(b), 27(e), Pub. L. 92–573, 86 Stat. 1208, 1228 (15 U.S.C. 2051(b), 2076(e)).

SOURCE: 42 FR 42783, Aug. 24, 1977, unless otherwise noted.

§ 1401.1 Scope.

This part 1401 establishes requirements under section 27(e) of the Consumer Product Safety Act (15 U.S.C. 2076(e)) for marketers and importers of self-pressurized consumer products that contain chlorofluorocarbons as propellants to provide notification of certain performance and technical data to prospective purchasers of such products at the time of original purchase and to the first purchaser of such products for purposes other than resale. The notification shall consist of a label on the product stating that it contains a chlorofluorocarbon that may harm the public health and environment by reducing the ozone in the upper atmosphere. Also, manufacturers and importers must provide the commission with reports identifying which of the self-pressurized consumer products sold by them contain chlorofluorocarbon propellants.

§ 1401.2 Purpose.

Chlorofluorocarbons are used as propellants in self-pressurized containers of a variety of products subject to the Commission's jurisdiction. Scientific research has indicated that chlorofluorocarbons may pose a risk of depletion of ozone in the stratosphere. The stratospheric ozone shield is of great importance in protecting life on earth from shortwave ultra-violet rays of the sun. Ozone depletion allows more of these rays to reach the earth, and the consequences include a possibility of a significant increase in human skin cancer and other effects of unknown magnitude on man, animals, and plants. Chlorofluorocarbon release may also cause climatic change, both by reducing stratospheric ozone and by increasing infrared absorption in the atmosphere. The Commission believes that the requirements of this part 1401 will enable consumers to make a conscious choice of whether to use products that contain chlorofluorocarbon propellants. The Commission also believes that these requirements are necessary in order to carry out the purposes of the Consumer Product Safety Act of (a) helping to protect the public against
